                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                on:
        Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 D8

SEQUENCE FROM N.A.  Zhang W., Wan T., Cao X.;  Submitted (NAY-1999) to the EMBL/GenBank/DDBJ databases.  Submitted (NAY-1999) to the EMBL/GenBank/DDBJ databases.  FUNCTION: RECEPTOR FOR TNFSF14. INVOLVED IN LYMPHOCYTE ACTIVATION.  PLAYS AN IMPORTANT ROLE IN HSV PATHOGENESIS BECAUSE IT ENHANCED  THE ENTRY OF SEVERAL WILDTYPE HSV STRAINS OF BOTH SEROTYPES INTO  CHO CELLS, AND MEDIATED HSV ENTRY INVO ACTIVATED HUMAN T CELLS.  -!- SUBGELLULAR LOCATION: TYPE I MEMBRANE PROTEIN (PROBABLE).  -!- TISSUE SPECIFICITY: WIDELY EXPRESSED, WITH THE HIGHEST EXPRESSION  IN LUNG, SPLEEN, AND THYMUS.  -!- SIMILARITY: CONTAINS 1 LA-NGFR/TNFR-TYPE CYSTEINE-RICH REGION.
